

Jews And The Spread Of AIDS

Dear Reader,

Please find enclosed a truly shocking document. BARON'S GUIDE TO "GAY" SEX was written by one of our researchers and is currently being distributed to selected Jewish homes. Even in this age of outspoken sexual frankness, most ordinary people are still blissfully unaware of the true nature of homosexual practices. In this short but shocking study, these practices are laid bare for all to see.

The past two and a half decades has seen the rise of the organised homosexual movement, while the past ten years has seen the rise of AIDS. Only a fool would fail to see a connection between the two, but so well organised has the homosexual movement become, so vocal and so powerful, that it has been able, with considerable success, to promote the fiction that AIDS is not a disease of homosexual related filth but something which could happen to anyone. The evidence does not bear this out, although certainly more and more innocent people are gradually becoming infected through unwitting contact with bisexuals, drug addicts sharing needles, in Third World countries (through lack of proper sanitation and sterile conditions in hospitals), and even as babies in the womb.

As they continue to strive to foist their poison on the rest of society, homosexuals have sought, and found, scapegoats. First they blamed Haitians. When this nonsense was refuted, they blamed Africans. When this proved untenable, they started spreading crackpot conspiracy theories about AIDS being invented by the US military or the CIA. None of these scapegoats having proved sustainable, who will they blame next? Who do people always blame when there is no one else left to blame?

In the 1950s, a Jewish doctor, Jonas Salk, invented a polio vaccine which saved countless children's lives and human suffering. Dr Salk was rewarded for his endeavours in June 1955 when American hatemonger Eustace Mullins published an article in the anti-Semitic magazine Women's Voice entitled Jews Mass Poison American Children. He accused the Jews of injecting children with live polio germs, which though technically true is an allegation too contemptible for words.

Mullins is still preaching his conspiracy theories today, but although he has not had the decency to renounce his former anti-Semitic libels, he appears to have parted company with the lunatic Jew-haters of the American fundamentalist right. But who needs Mullins with queers around?

Last year, Britain's most distinguished Talmudic scholar, Chief

Rabbi Emeritus Lord Jakobowits, said he welcomed the advent of genetic engineering which would allow the elimination of homosexuality from society. The reaction of the organised homosexual movement was immediate and vocal, letters were fired off to the press, a synagogue in Central London was picketed, and a campaign was started to rescind an honorary doctorate that was to be awarded to Lord Jakobowits by a Welsh university.

But disgraceful though this campaign was, the reaction of the so-called Jewish establishment and the Jewish press to this hysteria was even more disgraceful. Instead of giving Lord Jakobowits their unqualified moral support, so called "progressive" Jews rounded on him, taking the part of the enemies of Judaism and reservoirs of filth, the organised homosexual movement. Fortunately, the queers decided to bury the hatchet shortly afterwards, but briefly there was the terrifying spectacle of an all out war against Halakhah by the forces of darkness.

This threat has not yet passed, and there still remains the possibility that some far right group, or more likely some homosexual group, will blame the Jews for the spread of AIDS, thus opening up the terrifying prospect of Judaism coming under attack on two fronts from the vectors of disease and filth who dare to call themselves gay as well as from the usual Jew-hating crackpots. But, even more terrifyingly, Jews themselves are contributing to the likelihood of this happening by pandering to the gay "rights" movement. In February 1988, signatories to a petition against the government's attempts to clamp down on the public funding of queer porn (Clause 28) included "Rabbi" Julia Neuberger, Jewish actress Maureen Lipman, TV moguls Jeremy Isaacs and Alan Yentob, and MP Gerald Kaufman. The overwhelming majority of signatories were of course Gentiles, including Labour MPs Robin Cook and Brian Gould and SDP reject David Owen. But anti-Semites minds don't work like that, they see three or four Jews out of a few dozen people engaged in subversive activity and they immediately blame the Jews for manipulating the rest. And it's not just anti-Semites who have an incentive to do this - driven as they are by hate - but homosexuals, driven by the desire to blame someone else for the spread of a plague of their own making. In 1986, homosexual activist Peter Tatchell wrote: "Contrary to the mythology that Aids is a gay plague, the overwhelming majority of people with Aids are heterosexual, including as many women as men...Most of these Aids cases are in central Africa...In Africa it is estimated that 6% of the total population is now infected but in some countries it is much higher - 25% of the Malawi population, 23% of the Uganda population..."

These are lies and slander. Today, Tatchell heads the homosexual pressure group OutRage, which spearheaded the campaign against Lord Jakobowits. It is said that some Jewish gays actively supported this campaign. According to the Torah, there is no such thing as a Jewish gay anymore than there is such a thing as "half-Jewish". You're either Jewish or you're not, and if you're queer, you're not!

Why is it that many Jews including "Rabbi" Julia Neuberger give aid and comfort to homosexual propaganda? Jews often support minorities out of a sense of empathy. Having suffered persecution

in the past they feel they should defend anyone else who is persecuted or claims to be persecuted. The reality of course is that some people deserve to be persecuted - wilful vectors of filth and the poisoners of the minds of our children in particular. Because homosexuals can't breed they have to recruit people to their depraved lifestyle, and recruiting starts young, the younger the better. This is the real reason homosexuals have campaigned so loudly to reduce the age of consent, they've already got eighteen, but they're not satisfied with that, next stop it will be sixteen, and what next? Fourteen? Twelve? Before your son is old enough to be bar mitzvahed he'll be dragged into fellatio sessions with depraved paedophiles who will claim in court that he consented because he nodded his head in response to an indistinct question.

As far as the persecution of homosexuals is concerned, this is largely a myth. It is only the state which can engage in persecution, and the reality is that the state does not persecute homosexuals in any meaningful sense. Not in Britain. It is true that homosexuals are technically excluded from many professions, but those who practice their perversion discreetly without trying to make a virtue out of it are generally given a great deal of leeway. Employers turn a blind eye to homosexuals in much the same way they turn a blind eye to "perks" of the job. What homosexuals refer to or interpret as persecution is often simply social ostracism, and for the most part, this ostracism is thoroughly deserved. Most Jewish people wouldn't invite a fascist into their homes, so why should they invite a homosexual either? Why should anyone?

All the same, the Jewish establishment in particular seems determined to commit suicide by giving aid and comfort to homosexual propaganda, or at the very least to compromise and ignore it. When we published an attack on homosexual propaganda and a defence of Lord Jakobowits, the so-called Board of Deputies of "British" Jews and the "Jewish" Chronicle accused us of hate-mongering and attacked us in turn! Homosexual practices are sinful, and there can be no accommodating them under Halakhah. As the greatest Jewish thinker of our age, Ayn Rand, said: In a compromise between the good and the bad, the bad always wins.

We ask you to support our campaign to educate the goyim and in turn your own children about the poison of homosexuality. The enclosed pamphlet is also being distributed on a small scale to schoolchildren of a vulnerable age. We would like to distribute more; we would like also to publish one specifically for Jewish children, perhaps in Hebrew, and in more temperate language. We hope you will send us a donation to make this possible. Already tens of thousands of innocent people have been infected with that most terrible of diseases, AIDS, as a result of the sinful practices of homosexuals. Haitians have been blamed and acquitted, so have blacks, so has the CIA. Homosexuals are running out of scapegoats. The more Jews are seen to oppose the poison of homosexuality, the less the risk that they will be scapegoated for the AIDS Holocaust which is surely to come.
